

CASE STUDY

NATIVE HOSTEL CASE STUDY

- Location: - Austin, Texas, US
- Architect: - un.box studio
- Site: - Austin Texas
- Area: - 1765 sq.m
- Year: - 2017
- Category: - hostels & cafe

ARCHITECTURAL FEATURES

The warehouse was painted navy blue, and a bold mural featuring a bull's skull – a common symbol in the American West – is added to one side.

Merging all periods and styles, to create something that feels timeless; a place that could have been relevant many years ago is relevant today and will be relevant for many

WOODSY WHISPERS

- Location:-Ma'er Shan Village, Zhangjiajie, Hu'nan Province, China.
- Architect: - Shulin Architectural Design
- Site: - Zhangjiajie, China
- Area: - 1200 sq.mt
- Year: - 2020
- Category: - hostels

ARCHITECTURAL FEATURES

The material selection for the residence's facade in order to instill a sense of place, to support the relationship between construction and nature, and to use materials sourced locally.

Utilization of rich palette and textured materials, a theme aptly referred to throughout the design process as 'dark and stormy' balance out more authentic and traditional materials and ideas with modern construction and concepts.

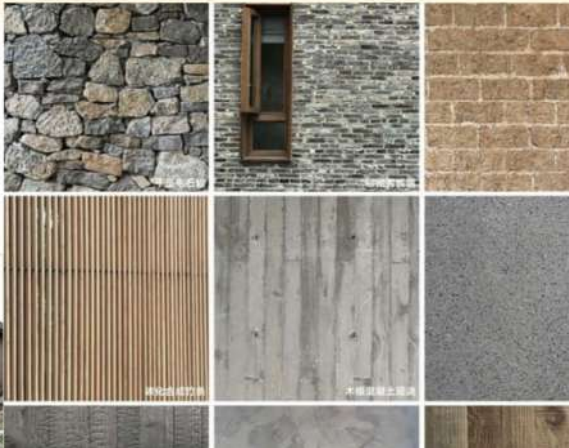

Relationship between materials including rough rubbles , grey bricks bamboo fences and wooden window frame

Relationships between washed granolithic stairs, rubbles and bamboo fences at the south side of the residence.

MATERIALS USED:

Material selection of the residence's facade to inherit a sense of locality, to support the relationship between construction and nature, and to utilize locally sourced materials. Materials like rubbles, mud bricks, washed granolithic, terrazzo, gray bricks, and little blue tiles are all commonly used by locals; they are easy to source, craft, and make the construction accuracy easily manageable.

CONCEPT

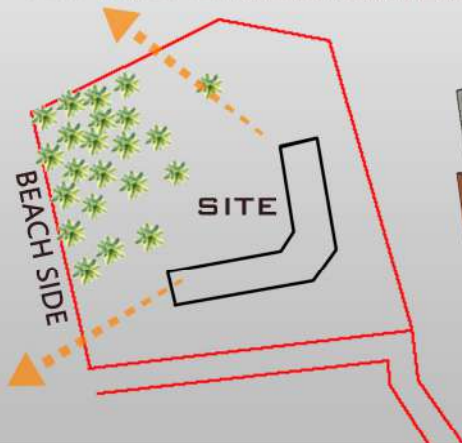

BACKPACKERS HOSTEL

"Backpacker" refers to the person travelling with a backpack, hostels and youth hostels became backpackers' hostels

INSPIRED FROM GOAN SHACKS ALWAYS FACING TOWARDS THE BEACH SIDE TAKING REFERENCES FROM THE BEACH SIDE HOSTELS

 PRIVATE

FACADE WAS DESIGNED BY A COMBINATION OF CUBOIDS PLACED ABOVE EACH OTHER IN IRREGULAR MANNER.

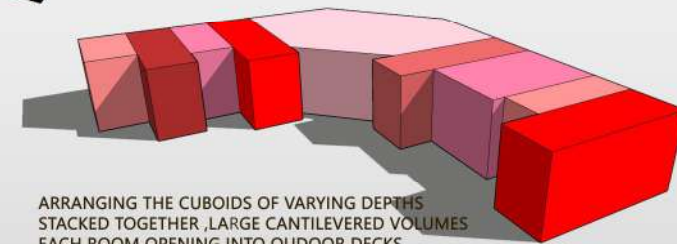

THE FIRST FLOOR CANTILEVER OUT AND STEP BACK AND FOURTH CREATING LINEAR TERRACES AT EVERY FLOOR

BASIC IDEA FOR THE DESIGN TO START WITH WAS MAKING THE DESIGN IN 2 DIRECTIONAL GROWTH. SO THERE WERE 2 BLOCKS MAKING L-SHAPE. THE GROWTH WAS FROM ONE POINT IN THE CENTRE TO 2 DIFFERENT DIRECTION.

AFTER THE FIRST DRAFT THE SECOND THING WAS TO MAKE THE ENTRANCE AND SEE THE CONNECTION WITH EXISTING SITE AND ORIENTING THE ROOMS TO VIEW THE BEACH.

ARRANGING THE CUBOIDS OF VARYING DEPTHS STACKED TOGETHER, LARGE CANTILEVERED VOLUMES EACH ROOM OPENING INTO OUTDOOR DECKS
